Project Description

A web-based project that accepts a text input of a project/assignment and breaks it down into a list of structured task(s) using an LLM, displaying the generated tasks in the user interface.

- The app allow users to upload project or assignment description

- The LLM takes the description decomposing the project or assignment into structured list of task(s)

- Shows task list for user to do that can be exported or be viewed on built-in viewer (think to-do list/kanban board)
